ZAGREB STEAM BOILER FACTORY PRODUCES
VARIOUS LARGE ITEMS

TO COMPLETE DELIVERY TUBE FOR POWER PLANT -- Belgrade, Rad, 25 Nov 50

Zagreb, 23 November -- The steam boiler factory in Zagreb will soon complete a 14-ton turbine delivery tube for the hydroelectric power plant at Zvornik on the Drina River. In the near future, the factory will begin the construction of two spiral feeders for a new hydroelectric power plant. The feeders will weigh 20 tons each.

Engineer Franjo First recently completed a blueprint of a ship's boiler. The heating surface of this boiler will be 40 square meters. The first model of this boiler will be completed next year. Later the boiler factory will construct ship's boilers with a heating surface of 120 square meters. The blueprints for these boilers were drawn by Engineer Uros Gulic of the Designing Office of the Council for Machine Construction.

FACTORY COMPLETES ASSEMBLY SHOP -- Ljubljana, Slovenski Porocevalec, 21 Nov 50

A large assembly shop of the "Franc Leskosek" Metal Construction Factory was completed recently. It will be in operation in December 1950.

METAL ENTERPRISES PRODUCTION UNSATISFACTORY -- Belgrade, Borba, 28 Nov 50

The production of the "Radijator" Factory in Zrenjanin, the "Partizan" Bicycle Factory in Subotica, and the "Istra" Armature Factory in Kula is proceeding unsatisfactorily, as their plans are not being fulfilled and production costs have risen. The work quotas in these factories, although very low, are not being fulfilled. Furthermore, the factories are not being supplied regularly with coke.

Insufficient amounts of zinc and potassium are being shipped to the "Istra" Factory, while the "Partizan" Factory is inadequately supplied with tubular steel for the production of bicycles.
